

Feature & Application	Default & React	Inspection
<p>rich in stereoscopic feeling for cylinder or simple curved shape for general resin (need a special treatment before print on PP/PE bottles. for cost saving, allow to print front and back side in one time, depends on the shape.</p>	<p>blocking script—NG broken words—NG brushed—range tilted—standard allocation—range</p>	Tape

Feature & Application	Default & React	Inspection
<p>precise multi-color allocation for shapes of flat or specific curve for general resin (need a special treatment before print on PP/PE bottles.) print front/back side separately</p>	<p>low saturation—none in flat feeling—none tilted—standard broken words—NG</p>	Tape

Feature & Application	Default & React	Inspection
<p>for flat shape for ABS, AS, PET, PETG resin (need a special treatment before print on PP/PE bottles.) standard color is shinny gold/silver, if not, a extra charge is needed.</p>	<p>broken words—NG thickness—range in flat feeling—none</p>	Tape

Feature & Application

Default & React

Inspection

only for ABS resin
 for general, metalization process includes UV coating, therefore it has a nice adhesion ability.
 If other deco needs to apply on it, it's necessary to adjust the hardness of UV coating, the adhesion will be lower as well.

dirt—Standard
 water marks—Range
 scratches—Range
 uneven color—Range

Cross-cutting

Feature & Application

Default & React

Inspection

for PMMA/AS resin.
 due to the spray is held inside, the adhesion of it is not important, UV coating is not necessary neither.

particle—range
 dirt—standard
 uneven color—range

None

Feature & Application

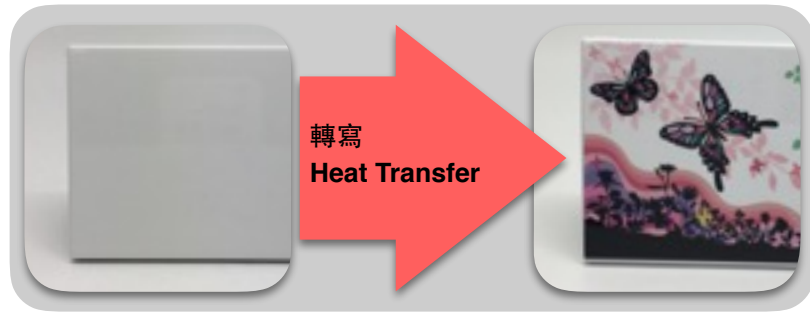

Default & React

Inspection

for ABS bottle
 for general, it includes UV coating, therefore it has a nice adhesion ability.
 If other deco needs to apply on it, it's necessary to adjust the hardness of UV coating, the adhesion will be lower as well.
 Note: the bottle would become easier to break after the process.

particle—range
 dirt—standard
 uneven color—range

Tape

Feature & Application

Default & React

Inspection

for ABS resin
 for flat object only
 a UV coating is needed to pass the alcohol wiping test.
 higher charge for pattern script.
 high MOQ of films. long sampling time.

tilted—standard
 color difference—range
 dirt—standard
 uneven edge—range

Cross-cutting

Feature & Application

Default & React

Inspection

for ABS resin
 for flat shape only
 esp. for multi-colour script
 a UV coating is needed to pass the alcohol wiping test.
 higher charge for pattern script.
 no script charge. fast sampling time.
 easy to change the script. high charge for printing fixtures.

tilted—Standard
 dirt—Standard

Cross-cutting

Feature & Application

Default & React

Inspection

for ABS/AS resin.
 the adhesion on the surface of PP is not good.

broken corner—NG
 brush— NG
 combination line—range
 scratches—range

Cross-cutting

Feature & Application

only for PP/PE bottles
high MOQ of films

Default & React

tilted—Standard
color difference—Range
dirts—Standard

Inspection

Cross-cutting
